

Environmental Project Consulting

KNOW THE RISKS

Did you know that prior to any equipment replacement, renovation, or construction project, it is critically important that all areas be surveyed for environmental hazards? This includes asbestos, lead, mercury and PCBs.

Environmental hazards that are not handled properly can result in citations, liability, and the loss of public trust.

Liability for environmental hazards during projects falls on the District and lasts forever!

“CESA 10 environmental project consulting experts gave me the peace of mind I was looking for when handling projects of all sizes. It is the district’s responsibility to handle environmental hazards safely and responsibly and CESA 10 environmental project managers help me do that in an affordable way. They also look out for the school’s best interests by overseeing abatement and other subcontractors. If you are thinking of doing a facility project, call CESA 10 first and make sure that all your environmental issues are handled.”

- Joe Zydowsky, District Administrator
School District of the Menomonee Area
District Administrator (Former)
School District of Cadott Community

ASK THE EXPERTS

CESA 10 has been providing facility-related services to schools for nearly 20 years. CESA 10’s facilities management services have expanded throughout the years to meet needs identified by school customers.

CESA 10 has certified professionals with Wisconsin licenses in Asbestos Inspecting and Management Planning to help aid in safe removal and disposal.

CESA 10 staff will perform extensive review of the environmental hazards, help with budgeting and scheduling, and ensure site verification to make sure the materials are effectively abated safely and correctly saving both time and money.

"I have found that working with CESA 10 has been a life saver for me. Everyone I've worked with has been very knowledgeable and understanding. I can honestly say I couldn't do it without them."

- Mike Stange, Maintenance Director
Bangor School District

PROTECT YOUR DISTRICT

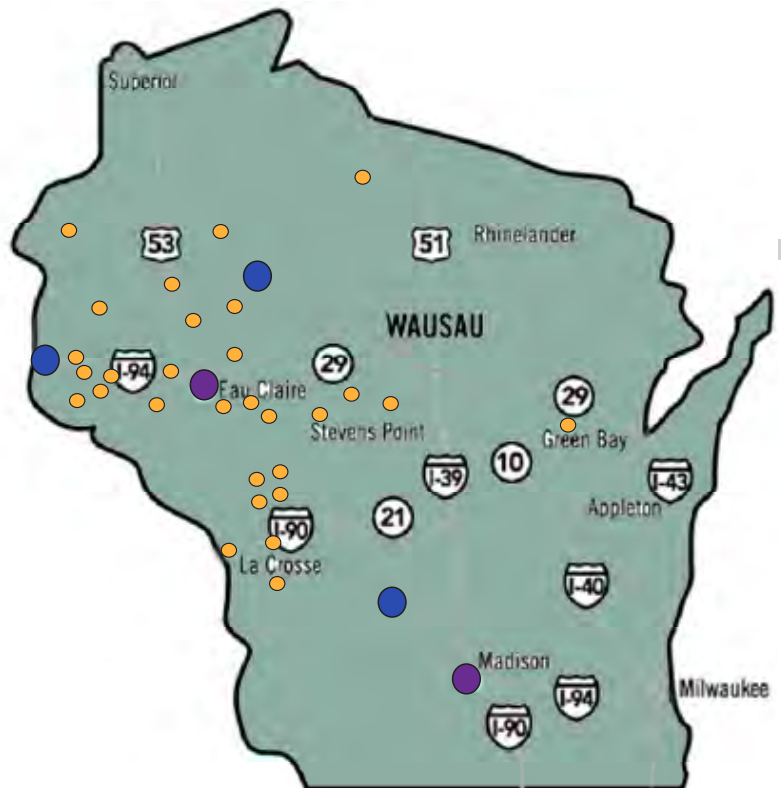

Asbestos-containing materials affect the manner in which buildings are evaluated, managed, renovated, or maintained. CESA 10 has been **providing superior remediation services** in asbestos removal, lead abatement, and removal of PCB and other hazardous materials **at the lowest cost possible** for nearly 20 years.

Services offered by CESA 10 staff include:

- Environmental Hazard Surveys
- Inspections
- Sampling and Monitoring
- Project Management
- Training
- Compliance Assurance
- Laboratory Services

Allow CESA 10 to assume the risk and responsibility for environmentally hazardous materials in your district.

CALL CESA 10 BEFORE STARTING ANY PROJECT TO MAKE SURE YOUR PROJECT IS SAFELY AND EFFECTIVELY PLANNED, SCHEDULED, BUDGETED AND IMPLEMENTED.
